

Azure Backup Deployment

Wanting backup that spans on-premise and cloud, and costs less?

It's rare to find a backup solution that does both on-premise and cloud well. And if you do, the cost can be prohibitive, either in terms of paying for storage you don't need, or the staff costs associated with managing it.

The Azure Backup Deployment solution provides integrated on-premise and cloud backup tools that are powerful, easy to manage, and cost less than traditional backup systems. And with over a decade of Microsoft cloud experience, Vigilant.IT can help solve your backup needs.

What you get

- An **enterprise class Azure Backup** service that spans **on-premise and cloud**, covering an agreed number of protected servers with a management system that **puts you in control**.
- Knowledge transfer from our Azure experts.

On-premise

- **VMware & Hyper-V** – backs up Windows & Linux VMs.
- **MS workloads** – supports Exchange, SQL, SharePoint, etc for faster recovery.
- **Local disk AND cloud** – backup to onsite disk then Azure cloud.
- **Easier management** through powerful Azure Backup Server tool.

Cloud

- **Azure IaaS VMs** – backup in three clicks.
- **Long term retention** – up to 9,999 recovery points.
- **Triple replicas** – all backups are replicated 3 times.
- **Data encryption** in transit and at rest.

Costs Less

- **Pay-as-you-go** – only pay for what you need.
- **No Azure charge for data transfers** for inbound and outbound traffic.
- **No capital investment** for cloud based backup and recovery.
- **Save on network costs** through incremental backups and compression.

Why Vigilant.IT?

- Over a decade of Microsoft cloud experience.
- Multiple Microsoft Gold cloud competencies and product testing experience with Microsoft.
- Qualified Azure Architects and Microsoft MVPs (Most Valued Professionals).
