

Azure Health Check

Interested in a healthier Azure environment
AND reduced costs?

If you've ever faced challenges like having confidence that your Azure environment is healthy, controlling the growing cost and complexity of Azure subscriptions, helping your Azure admins be more productive, or making sure your Azure services are available 24x7, there's good news.

The Vigilant.IT Azure Health Check identifies what's unhealthy, helps your staff understand the issues, AND identifies how you can reduce your Azure billing, admin or downtime costs.

What you get

- Assessment report on your Azure environment
- Knowledge transfer to help your staff understand the issues
- Identified cost savings in billing, admin or downtime costs

For an additional cost, we can also remediate the issues.

Health Check Assessment

- **Extensive check** of your Azure environment from multiple angles
- **Data-driven** AND question based
- **Prioritised** recommendations
- **One report** that aggregates recommendations from multiple sources into one

Knowledge Transfer

- **Proactive** – our Azure experts work with your team to identify health issues BEFORE they cause problems
- **Training** – the goal is ongoing health, so we show your staff various tools and techniques to assist this goal

Cost Reduction

Our health check focuses on cost reduction in three key areas:

- **Billing** – we identify areas that can reduce your Azure bill
- **Admin** – staff costs are significant. We show you how to make them more productive
- **Downtime** - reduce costly downtime by ensuring your Azure services are correctly configured

Why Vigilant.IT?

- Over a decade of cloud design and build experience with Microsoft
- Multiple Gold cloud competencies and product testing experience with Microsoft
- Qualified Azure Architects and Microsoft MVPs (Most Valued Professionals).
