Azure Site Recovery

Interested in easier disaster recovery with less cost?

Disaster recovery seems to bring its own set of problems. Whether it's complex setup and management, long recovery times, production impact when testing it, or the significant expense of a secondary datacentre, DR can be challenging. Let Vigilant.IT take the hassle out of DR.

The Azure Site Recovery solution delivers easier management of your disaster recovery needs without the expense of a secondary datacenter. It reduces your recovery time, and allows you to test recovery without impacting production.

What you get

- An **enterprise class Azure Site Recovery** service that is both **scalable** and **agile**, covering an agreed number of protected servers with a management system that **puts you in control**.

- Knowledge transfer from our Azure experts.

Easier Management

- **Automated protection** – easy to configure, and easy to trigger.

- **No-impact testing** – test your DR solution without impacting production.

- **Orchestration options** – for more complex recovery scenarios, leverage orchestration that puts you in control.

Reduced Costs

- **No secondary datacentre needed** – leverage Azure infrastructure to restore your services.

- **Only pay for DR VMs when active** – when your Azure DR VMs are inactive, you only pay for storage used.

Faster Recovery

- **Reduce work lost** – dramatically reduce the amount of work that can be lost and will need to be redone ie Recovery Point Objective (RPO).

- **Back to work sooner** – dramatically reduce the amount of time it will take before employees can start working again ie Recovery Time Objective (RTO).

Why Vigilant.IT?

- We use ASR in our own datacenters for our managed service clients.

- Multiple Microsoft Gold cloud competencies and product testing experience with Microsoft

- Qualified Azure Architects and Microsoft MVPs (Most Valued Professionals).
