

Azure Stack Lab

Wondering if Azure Stack is what you need?

As a relatively new product, evaluating Azure Stack can be tricky. Challenges like creating a valid lab to test it in, knowing how to check if your applications and infrastructure are compatible, and finding answers when you get stuck, can block your way forward. Let Vigilant.IT clear the way.

The Azure Stack Lab creates a valid test environment where we show you how to evaluate if your applications and infrastructure are compatible. Our experts ramp up your staff fast, clearing up common misconceptions and providing seasoned advice throughout the engagement.

What you get

- Azure Stack lab running the Development Kit (on your infrastructure)
- Interactive workshop covering applications, infrastructure and ops.
- Knowledge and advice from our Azure Stack experts.

We can also do hardware requirements validation.

Lab Build

- **Install** – we simply the installation by doing it for you.
- **Verify** – each installation is verified.
- **Configure** – we fast-track initial setup and configuration.

Evaluate

- **Applications** – you can validate that your apps work with Azure Resource Manager.
- **Infrastructure** – check your infrastructure against known constraints.
- **Operations** – identify possible operation changes required.

Educate

- **Ramp up** – core concepts are taught up front so staff can focus on evaluating Azure Stack.
- **Misconceptions** – we clear up common myths that can derail evaluations.
- **Advice** – we provide seasoned advice to keep your evaluation on track.

Why Vigilant.IT?

- Vigilant.IT are Azure Stack experts, being a lead partner in the early adopter program, and with ongoing connections to the product group.
- Multiple Microsoft Gold cloud competencies and product testing experience with Microsoft.
- Qualified Azure Architects and Microsoft MVPs (Most Valued Professionals).
