

# Intune Deployment

Needing a productive and secure device experience?

With an increasingly mobile workforce, how do you provide users with anytime, anywhere access on multiple devices in a productive, easy to use way. And how do you do that while protecting corporate data?

**Our Intune Deployment solution implements a device and app management platform that is easy to use for staff and admins alike, by integrating deeply with popular tools like Office 365 and Azure AD. It supports managed and unmanaged Android, iOS & Windows 10 devices while ensuring corporate data is protected from unauthorised access.**

## What you get

- An enterprise class Microsoft Intune cloud environment covering an agreed number of devices.
- Knowledge transfer from our Intune experts to help your staff hit the ground running.

We also offer managed services around Intune.

## Productive

- **Seamless experience** – Intune integrates with AD, Office 365 and more to provide a seamless experience that frees your users to do their best work.
- **Work anywhere** – users can securely access resources from any location.
- **Fast setup** – set up a user's device in minutes not days to get them up and running quickly.

## Secure

- **Protect corporate data** by defining what users can and can't do with email and documents.
- **Wipe information** – selectively wipe corporate data while leaving personal data untouched.
- **Configure settings** on devices and apps to ensure the right level of security for each scenario eg PIN length, encryption.

## Flexible

- **Managed and unmanaged devices** – manage both corporate owned and personal devices securely.
- **Multiple platforms** including Android, iOS, Windows 10 and MacOS.
- **Manage apps** from the Apple Store, Google Play, Microsoft Store, in house (LOB) and Win32 apps.

## Why Vigilant.IT?

- One of 45 partners chosen worldwide to be part of the Microsoft EMS Elite program, which includes Intune.
- One of two Microsoft Enterprise Mobility (Intune) MVPs in Australia.
- Multiple Microsoft Gold cloud competencies and product testing experience with Microsoft.
