

Identity & Threat Protection Solutions

Need help protecting your Microsoft 365 environment?

The threat landscape is constantly changing, making it difficult to keep up. Identity theft, compromised devices, data loss through shadow SaaS apps – the list goes on. And with a major skills shortage in the IT security space, most businesses are struggling with the growing cyber threat.

Vigilant.IT's Identity & Threat Protection solutions provide a range of tools for protecting your Microsoft 365 users, devices and apps, and scale from quick wins in days to strategic plans that address comprehensive security needs.

What you get

An enterprise grade solution comprising some or all of the following:

- Azure Advanced Threat Protection (ATP)
- Azure AD Premium P1/P2
- Microsoft Cloud App Security
- Microsoft Defender ATP
- Office 365 ATP P1/P2

We can also manage your Microsoft 365 environment.

Protect Users

- **Suspicious logins** – detect suspicious Azure AD logins and control access eg block or require MFA.
- **Admin accounts** – enable “just in time” access, alerts and monitoring to protect administrator accounts.
- **Identity attacks** – detect and investigate malicious identity attacks both on-premises and in the cloud.

Protect Devices

- **Antivirus** protection for multiple OSes.
- **Vulnerability management** for applications.
- **Device attacks** – detect and investigate malicious endpoint attacks.
- **Global insight** using AI and Intelligent Security Graph.
- **Auto-remediate** common issues.
- **Threat experts** for security advice.

Protect Apps

- **Email attacks** – protect against malicious URLs, attachments, and phishing attacks.
- **Global intelligence** – detect, investigate and remediate attacks using AI & global telemetry.
- **SaaS apps** – ensure proper usage, identify & protect against cyber threats, and prevent data loss for all your SaaS applications.

Why Vigilant.IT?

- Years of cloud experience protecting our clients' Azure and Office 365 environments.
- Multiple Microsoft Gold & Silver cloud competencies.
- Qualified Azure Architects and Microsoft MVPs (Most Valuable Professionals).
