

Azure Stack Validation Centre

Needing to validate your Azure Stack use cases?

You understand the value proposition of Azure Stack, but need to validate your use cases on production-grade hardware. What if you could test out your Azure Stack scenarios while getting expert help? What if you could simply connect over the Internet? Good news – you can!

The Azure Stack Validation Centre brings together world class facilities, hardware, services and staff to provide you with a production-grade 4-node Azure Stack system that you can use to validate your use cases.

Azure Stack Environment

- HPE ProLiant for Azure Stack 4 node system, totalling 2TB RAM, 224 cores, 65TB storage.
- Internet facing (256 IPs)
- ExpressRoute connectivity.

Contact Information

- tward@vigilant.it
- grant.johnstone@hpe.com
- darren.mann@ap.equinix.com

Equinix Facilities

- **IBX data centres** – state of the art facilities, average global uptime of 99.9999%, multiple compliance standards eg SOC 1&2, ISO 27001.
- **ECX Fabric** – secure, fast, dedicated ExpressRoute connections to Azure and other providers.
- **Vendor hub** – major hub for electronic payment, capital markets, and trading.

HPE Hardware

- **Most configurable** – choose the right processor, memory, storage and 3rd party hardware options.
- **Maximised performance** – up to 120TB raw storage capacity per node, 66% boost in memory bandwidth.
- **Unmatched security** – includes HPE Silicon Root of Trust, Runtime Firmware Verification, and Secure Recovery.

Vigilant.IT Services

- **Experienced** – Azure Stack early adopter leads, multiple Azure Stack projects, deep product group connections.
- **Experts** – Azure Stack certified, and Datacenter and Azure MVPs (Most Valuable Professional).
- **Certified** – Gold competencies in Datacenter and Cloud Platform.

Why Validation Centre?

- **FREE** for valid Azure Stack sales opportunities.
- Pre-configured Azure Stack solution templates such as microservices, blockchain, Kubernetes, and Cognitive Services.
- World class Azure Stack experts all in one place.
- Easy path from PoC to production if desired.
