

## Microsoft Managed Desktop Onboarding Offer

Over the last two years, Vigilant.IT has been refining our IP to deliver the Microsoft Modern Management platform to a wide range of clients with varying security requirements. Our IP consists of a documented approach, standard templates, and custom-built code to give our clients an efficient and cost-effective entry into Microsoft's Modern Workplace Management technologies.

**Vigilant.IT's automation framework reduces the time to go from concept to delivery of a Modern Management platform. The immediate benefit being the ability to automate the build of new devices more cost-effectively and efficiently – saving the organisation time and money, while freeing up IT to do more strategic work.**

**Once the tenant has been provisioned, you will be able to use Windows AutoPilot to build your laptops into Azure Active Directory with these additional features**

- Primary hard drive encrypted with BitLocker
- Windows Update for Business configured to meet industry standards
- OneDrive Known Folder Move enabled
- Office 365 installed
- Company Branding implemented

**Vigilant.IT will also work with your team to review and validate the following components to ensure your staff have a fantastic day one experience**

- Windows Hello for Business
- Corporate WiFi authentication
- Conditional Access to corporate data
- Certificate issuing infrastructure
- Drive mapping to existing file servers

**Vigilant.IT can also work with your team to help identify strategies to migrate existing files and applications to the Microsoft Managed Desktop platform.**

**In addition to the above configurations, Vigilant.IT will leave you prepared and trained to deploy Microsoft Managed Desktop to your environment successfully, our FastTrack package leaves you with the following artifacts**

- Package customer-specific applications
- Create/update logon scripts to map existing file and print shares
- Enable Windows Hello for Business
- Provide training to your internal IT team on how to use the platform

At the end of the engagement, Vigilant.IT will provide an as-built document detailing the Microsoft Intune configurations, along with any additional configurations made during the engagement.
